

Flex Fit 2 & Versa Fit Stirrups

Increase your surgical team's performance with Skytron Flex Fit 2 stirrups. These industry leading lithotomy stirrups set a new standard for patient positioning in the operating room, making adjustments for gynecologic, urologic and laparoscopic procedures simple and quick.

The Flex Fit 2 allows for the control of over three axes of motion with a single trigger-grip handle. Surgeons can control abduction, adduction, and lateral leg rotation without compromising the sterile field. The trigger-grip handle is designed for better control of the patient's leg, reducing the risk of injury to both patient and surgeon.

The Versa Fit increases surgery turnaround by offering a unique-multi-boot system. Three sizes of boots range from the Standard boot up to the Bariatric HD boot that offers ample space for your largest patients.

Flex Fit 2
